

Piano Song

Chew Lips

The pivot that we circle round
Find something to hold
Learn to be afraid while we wait for more

It made me never want to lie
'Cause I had before
Everything polarised and now we wait for more

Honouring our wild devotion
I wash in morning warmth
It sleeps a distant notion and now we wait for more

I'm clearing out my flat today
I'm taking off the doors
No history, no gates, we wait for more

Baby we can go away
Between the night and dawn
Your life ahead in frames, we wait for more

All the trades we dislike
We count them as our own
Sick of being unkind and now we wait for more

Everything you'll ever dream,
Someone dreamed before
Won't you chase them please we wait for more
