

God Save the Queen

Chicago

Smoke in the sky, slime in the sea
Tall timber tumblin' down around me
Red acid rain glows in the night
Nuclear winter closes down on me

The light of the world is fading to black
And the absence of people who care
Is bringing me down, bringing me down

God save the queen
Dear mother earth is dying away
Time's running out
One more tomorrow depends on today

Nowhere to run, nowhere to hide
Greenhouse condition getting' steamier
Nobody's clean, nobody's free
Nobody's breathin' any easier

The children of earth are dying each day
And the nightmare of who is to blame
Is bringing me down, bringing me down

God save the queen
Dear mother earth is dying away
Time's running out
One more tomorrow depends on today
