

# I. Flight of the Navigator

Childish Gambino

I had a dream  
I had a dream I was flying over all of us  
There were so many pretty people  
So many pretty faces  
I talked to some birds  
I fell in love again  
And none of this ever ended  
Everything just kept going, and going and going  
And even when you laughed, you cried  
And even when you were sad you were really happy  
Because you were here  
And I got to meet every star, every planet  
Everything that made me  
And we all kissed  
And became the same  
We became the same  
We became the same

Who would have thought this  
We almost lost it  
When you lie inside darkness it's hard to see  
And we sleep in tradition  
Keep them off in the distance  
To tell you that I haven't been

We are all  
Cold water  
Why try at all?  
Why bother?

x4  
Just hold me close my darling

Who would have dreamed this?  
You couldn't mean this  
It would be some type of meanness to where you are  
Cause I don't know where to go  
And no one else seems to know

We are all  
Night's fallen  
Why try at all?  
Dark callin'

x2  
So we're left alone  
No one left to call upon  
Be still now, broken bones  
As I travel on just hold me close my darling  
Just hold me close my darling (x3)
