

Notes in Constellations

Chiodos

I see her smile, in her sleep
And know that she's a dreamer
I follow every move she makes
It's been a long long night
Say you're mine

Can't keep you tonight
Tonight

We dance around just like constellations
To keep my body warm
We dance around just like constellations
You're keeping me awake at night
You make my body warm

And I fall for her
Like snow from the sky
Gracefully land in her arms
I melted away
Like snow into the ground
I told her I gotta go
I gotta go

We dance around just like constellations
To keep my body warm
We dance around just like constellations
You're keeping me awake at night
You make my body warm

It's been a long long night
To say goodbye
I felt so bad but I hate to go
She never wanted me to leave her
To leave her

We dance around just like constellations
We dance around just like constellations
We dance around
We dance around
We dance around
We dance around
You make my body warm
You make my body warm
