

# Ole Fishlips Is Dead Now

Chiodos

Away with the sheets  
Exploding like the stars across the sky

This mirror is feeding me lies  
I look so beautiful but just as desperate  
A victim of the plague with veins reaching to the sky  
I'm chewing on my teeth and staring into a black hole  
Let go of your demons

She's in love, oh, she's in love with herself  
And I never should've trusted someone else with my insides

Goodbye never feels complete, there's always one word missing

I want to forget you,  
You've broken everything I love  
Took all my light and turned it into dusk

I regret all I gave you  
You've broken everything I love  
And I can't wait to be myself again

I feel the separation  
I feel it deep inside my bones  
I know you're sharing beds with strangers,  
In sharp corners

Goodbye never feels complete, there's always one word missing

I want to forget you,  
You've broken everything I love  
Took all my light and turned it into dusk

I regret all I gave you  
You've broken everything I love  
And I can't wait to be myself again

Manipulate  
Play with insides  
Splash around in my blood  
Take what you want  
Take what you want from me

This is love.

I want to forget you,  
You've broken everything I love  
Took all my light and turned it into dusk

I regret all I gave you  
You've broken everything I love  
And I can't wait to be myself again

This is love.
