

# Under Your Halo

Chiodos

Lonely bird, sing me your song  
I'll stay awake until I see the sunlight  
Hear your voice and I know you're alright  
I can't wait to feel each inch of you tonight

And all I can do now  
Is wait to leave the ground

I feel invincible, so chemical around you  
Flying high, I'm so alive beside you  
All the stars above are under your halo  
I'll take every breath and every lie about you  
Everything, fuck the world without you  
Pull me higher up, just like an angel  
I'm under your halo

Lonely bird, lend me your ear  
I should have never let my eyes blink that night  
Draw a map on the small of your back  
Kiss your forehead cause I didn't want to wake you for goodbye

And all I can do now  
Is wait to leave the ground

I feel invincible, so chemical around you  
Flying high, I'm so alive beside you  
All the stars above are under your halo  
I'll take every breath and every lie about you  
Everything, fuck the world without you  
Pull me higher up, just like an angel

Halo, halo (2x)  
Holding up the stars, holding up the stars with your halo, halo  
Lighting up my scars, lighting up my scars with your halo

I feel invincible, so chemical around you  
Flying high, I'm so alive beside you  
All the stars above are under your halo  
I'll take every breath and every lie about you  
Everything, fuck the world without you  
Pull me higher up, just like an angel  
Just like an angel, I'm under your halo
