

Never Far Away

Chris Cornell

1. You are the road that I will travel, you are the words I write
You are the ocean I will swallow, you are the wind I ride
You are the cause to keep my head up high, I will survive
You gotta know I'll stay beside you, right till the day I die

*: I don't want to change anymore
I've already paid
I don't have to pray anymore
Because my soul has been saved

R: Wherever I come, wherever I go, you're never far away, far away (3
x)
Never far away

2. You're the blood that's in my veins, you're my second skin
I'm a feather on the wind, you will bring me in
Every heart should have a beat, every night a dream
Every king should have a queen, every saint a sin

*: I don't want to change anymore...

R: Wherever I come...

When I go hot you make sure I don't break
Gimme life inside of heaven's gates, I know it's heaven
You taught me how to live like life hurts
Gave me definition for the worst I know that there ain't no space

between you and me

R: Wherever I come...
