

# Under the Same Sun

Chris Norman

How come in our cities so much love is left alone?  
Lazy days just pass  
How come so many children have a heart without a home?  
Life on broken glass

It's time to realize  
The loving kind must rise and believe in life

Come on, people, we all live under the same sun  
Stick together now  
Come on, people, underneath it all we're one  
Stick together now  
Cause we were born and we're livin under the same sun

Why's that? There's a hole where faith and sweetness used to be  
This is not the way  
Wake up, you know the remedy is hope, so sing along  
We keep our heads held high!

Come on, people, we all live under the same sun  
Stick together now  
Come on, people, underneath it all we're one  
Stick together now  
Cause we were born and we're livin under the same sun

There's a place where future lies  
Take a deep breath and don't think twice  
Open up your arms and eyes  
And rise as you stand strong and believe in life

Come on, people, we all live under the same sun  
Stick together now  
Come on, people, underneath it all we're one  
Stick together now  
Cause we were born and we're livin under the same sun
