You can feel your nerve endings
They've been dead before today
You can feel them rising
Feel them rising all the way
You've got grease on your fingers
Oil on your face
Happy completely chasing the pace
Happy to find out even this late

You're not a number

There's a new sense of freedom

Come banging on your door

Deep down inside you

You've seen it all somewhere before

Somewhere in the past

Somewhere in a dream

It's got you completely and you know what it means

Happy to find out even this late

You're not a number

There's a new sense of freedom

Come banging on your door

Deep down inside you

You've seen it all somewhere before

You've got grease on your fingers

Oil on your face

And you're happy completely chasing the pace

Happy to find out even this late

You're not a number
