

The Best Song Ever

Chris Rice

Take a good look at yourself
You're probably singing along
Lying alone in your room
Or cruisin' down an empty road
Or maybe you're on your feet
In a crowd of strangers and friends
The spotlight's on someone else
But you feel like you're part of the show
What's the magic in the music
And why does it bring us together like this
We all have a longing inside
And it keeps us singing song after song after song

We're all waiting for the best song ever
It's somewhere out there, and everyone can feel it
We keep waiting for the best song ever
And when it arrives the whole world's gonna hear it
Yeah, the best song ever
Someday we'll all be singing it together

Where will the song come from
Who's gonna find the right words
Come up with a melody
That rings in every human soul
Well dig out your instruments
Make sure they're all in tune
Cause nobody knows how long
But we still got some singing to do
Cause there's magic in the music
Just look how it brings us together like this
We all have a longing inside
And it keeps us singin' song after song after song

We're all waiting for the best song ever
It's somewhere out there, and everyone can feel it
We keep waiting for the best song ever
And when it arrives the whole world is gonna hear it
Yeah, the best song ever
Someday we'll all be singing it together
The best song ever!
