

# Feelings Without Weight

Chris Trapper

Early in the morning get your suit on and I'm warning you  
Put lotion on the sun can burn real mean  
But don't forget your dreams to bring along  
Mary's packing sandwiches and I can bring the bandages  
This summer we will climb the cliffs for sure  
Forget who you were 'cause we are gone

I've been fading for so long I'm lost completely  
I long to just get washed out in the waves  
And feel the ocean floor fall out beneath me  
Feelings without weight

Reaching for the radio who does the song we'll never know  
Though this moment will be frozen ever long  
I won't forget the place or the expression that your face linge  
red on  
And though you sit right next to me your eyes at times are hard  
to see  
Secrets that car windows only know  
Are you remembering the hands of a lover in the sand long ago

I've been fading for so long I'm lost completely  
I long to just get washed out in the waves  
And feel the ocean floor fall out beneath me  
Feelings without weight

Stop and we will pay to park and Mary is afraid of sharks  
Even though she knows she will dive in  
We are within reach we have reached the beach so let us swim

I've been fading for so long I'm lost completely  
I long to just get washed out in the waves  
And feel the ocean floor fall out beneath me  
Feelings without weight
