

# Come Fly Away

Chris Webby

I'm in flight school, I'm takin' flight brotha  
Pilot of my own plane like the Wright brothas  
Pull an Amelia Earhart  
And just sky-rocket to the top of the charts  
I'm with John Glenn and Neil Armstrong on the moon  
Blastin' off to Mars, I should be there soon  
Skip Jupiter and hop right over to Neptune  
Hit warp drive, aliens be smellin' the fumes  
I'm so fly I'm in the galaxy, no handlin' me  
I chill on Pluto 'cause man you're still a planet to me  
I take flight everyday, launch pad, okay  
Rock Orion's Belt and dip my cookies in the Milky Way like

Come, come fly away with me  
We'll wander through the stars  
And touch down on Mars  
So come and fly away with me  
No need for gravity out in the galaxy  
So come and fly

I live it how I say when I ride that beat  
Not even Captain Kirk know how to fly like me  
In outer space, somethin' like Anakin  
Then I turn to Vader and can't nobody damage him  
I could make the planet spin, peace and I'm outta here  
Lightin' up a blunt as I'm passin' through the atmosphere  
Pass it to my passenger, mami's gettin' high now  
Me and her are nuthin' but a light up in the sky now  
Sex on a space station and she loves it  
No gravity needed we just does it  
Fly can't top me, can't nobody stop me  
Better get your telescope out and just watch me, yeah

Come, come fly away with me  
We'll wander through the stars  
And touch down on Mars  
So come and fly away with me  
No need for gravity out in the galaxy  
So come and fly

I am now so fly that astronomers study me  
Time to fly away, mami you should come with me  
Scoop her up in the Big Dipper  
Crash-land on Saturn, burn and sip liquor  
Earth is okay, I'm right here today  
But tomorrow I'm gonna be light-years away  
No Apollo 13, mother fuck a space shuttle  
Way above Sky Lab, stars, and the Hubble  
Causin' mad trouble 'cause home was too boring  
But I'll be back eventually when I'm finished exploring  
So, ground control to Major Tom  
I'm gone to infinity and beyond

Come, come fly away with me  
We'll wander through the stars  
And touch down on Mars  
So come and fly away with me

No need for gravity out in the galaxy  
So come and fly

So come and fly  
So come and fly  
If you could fly, would you fly with me, with me?  
If you could fly, would you fly with me?
