

It Must Be Christmas

Chris Young

Weather's getting cold again
The leaves are falling off the trees
You can almost sense it's time
For jingle bells and wrapping things
Every driveway's full of cars
Kids out of school in the yards

When there's lights on every street
The snowflakes on everything
Well it's just what you've been waiting for all year
When you believe in Santa Claus
When you give gifts just because
And you drive all night only to be near
The ones you love
Well it must be Christmas

All you see is red and green
And people wearing winter coats
Every church has a Nativity
For everyone to see
That's how you know

When there's lights on every street
The snowflakes on everything
Well it's just what you've been waiting for all year
When you believe in Santa Claus
When you give gifts just because
And you drive all night only to be near
The ones you love
Well it must be Christmas

When you believe in Santa Claus
When you give gifts just because
And you drive all night only to be near
The ones you love
Well it must be Christmas
It must be Christmas
