

# Never Be Afraid Again

Christian Walz

I won't breathe you now, I won't let you take me down  
To your underworld, to your underworld,  
I will follow thee, rising bubbles to the sky  
Like a melody, like a melody...

I will never be alone, this could be my other home

I will never be afraid again, hold your breath then count to ten

Stay for silence, stay for when I will never be afraid again  
No I'll never be afraid, close your eyes and count to ten  
Stay for silence, stay for when I will never be afraid again

It's a sudden change, from the surface to below  
It's a different town, but you've got underground  
You used to SOS, when you know you gonna drown  
Try to stay alive, surrender to survive...

I will never be alone, this could be my other home

I will never be afraid again, hold your breath then count to ten

Stay for silence, stay for when I will never be afraid again  
No I'll never be afraid, close your eyes and count to ten  
Stay for silence, stay for when I will never be afraid again

Find a light above the sea (oh no), cross your heart and follow me

Imagine how it all could end, imagine how it all could be

I will never be afraid again, hold your breath then count to ten

Stay for silence, stay for when I will never be afraid again  
No I'll never be afraid, close your eyes and count to ten  
Stay for silence, stay for when I will never be afraid again
