## Lift Me Up

## **Christina Aguilera**

So the pain begins
As the music fades
And I'm left here with
With more than I can take

If you lift me up
Just get me through this night
I know I'll rest tomorrow
And I'll be strong enough to try

When the static clears
And all is said and done
I will realize
That we all need someone

If you lift me up

Just get me through this night

I know I'll rest tomorrow

And I'll be strong enough to try

So when you see me crashing And there's nowhere left to fall Will you lift me even higher To rise above this all

If you lift me up Said if you lift me up

Whoo-yeah, ahhh-yeah (repeat x2)

Said if you lift me up Will you lift me higher

When you see me crashing And there's nowhere left to fall Will you lift me even higher To rise above this all

If you lift me up
Said if you lift me up
If you lift me up
Just get me through this night
