

# One Night

Christina Perri

I feel the way you want me  
I see that you are lonely  
If you couldn't know, you'd leave with me  
It's more than curiosity  
And I've never longed for winter  
Till your presence made me shiver  
Untethered you'd be better if you'd only come with me

One night I will be the moon  
Hanging over you  
(Spilling all over your body)  
(Covering all your wounds)  
One night I will be the star  
Follow where you are  
(Swimming in the depth of my love)  
(Filling your empty heart)  
One night, one night, one night  
One night, one night, one night

You've come so close to tasting  
Now my innocence is breaking  
Like the ocean in a perfect storm  
It makes me want you even more  
And I've never been so jealous  
I've never felt so helpless  
So out of breath and hungry for you

One night I will be the moon  
Hanging over you  
(Spilling all over your body)  
(Covering all your wounds)  
One night I will be a star  
Follow where you are  
(Swimming in the depth of my love)  
(Filling your empty heart)  
One night, one night, one night  
One night, one night, one night

Hurry, the sun is waking  
Darling, don't leave me waiting

One night I will be the moon  
Hanging over you  
(Spilling all over your body)  
(Covering all your wounds)  
One night I will be the star  
Follow where you are  
(Swimming in the depth of my love)  
(Filling your empty heart)  
One night, one night, one night  
One night, one night, one night  
One night, one night, one night  
One night, one night, one night
