

# Long World

Christopher Cross

There's a brand new light in my life  
Shines after the candle is out at night  
It's gotten the best of me  
It's got my heart and it won't set it free

I just can't tell you why  
If I did, well, it might be a lie

It's a long world we're living in  
I've got to have her from beginning to end  
It's a long world we're living in  
I just can't live without her

Does anybody know how it feels to want her this bad?  
So bad you'd give your life away  
There's gotta be somebody somewhere  
Who needs someone like I need you

I just can't tell you why  
If I did, well, it might be a lie

And it's a long world we're living in  
I've got to have her from beginning to end  
It's a long world we're living in  
I just can't live without her  
I just can't live without her

And I wait for the day to take her away in vain  
And I realize, I'll always feel the same

There's a brand new light in my life  
Shines after the candle is out at night  
It's gotten the best of me  
It's got my heart and it won't set it free, yeah

I just can't tell you why  
If I did, well, it might be a lie

It's a long world we're living in  
I've got to have her from beginning to end  
It's a long world we're living in  
I just can't live without her  
I just can't live without her

Well, it's a long world we're living in  
And I've got to have her from beginning to end  
Well, it's a long world we're living in  
I just can't live without her

I just can't live without her  
No, I, I just can't live without her
