

# Open Up My Window

Christopher Cross

Every night  
I open up my window  
Open up my window  
And let your love come in

Every night that I'm away from you  
This old bed seems way too big  
And my dreams so small  
Goin' through the motions  
As I stare out from my room  
I begin to realize  
That we're sharin' the same moon

Lying here hugging my pillow in the dark  
Dreaming of your comfort  
Fightin' the lonely in my heart  
And I thought I felt you touch me  
In that old familiar way  
When the wind came through the curtains  
And I heard it call your name

Ooh the time goes draggin' by  
Send my love across the sky  
Maybe it's all that I can do

Baby until I'll be with you

I missed you girl more than you'll ever know  
I kept a little vigil by my window  
It's funny but it's true  
Darlin' I did the same for you  
Now no matter where we are  
We can wish upon that star
