My Little Love-Light

Chuck Berry

This little love-light of mine are you gonna let it shine This little love-light of mine are you gonna let it shine This little love-light of mine are you gonna let it shine Let it shine, let it shine, let it shine

With your arms wrapped around me my little lovelight will shine With your arms wrapped around me my little lovelight will shine With your arms wrapped around me my little lovelight will shine Let it shine, let it shine, let it shine

Someday soon you promised me you'd make my love-light shine Someday soon you promised me you'd make my love-light shine Someday soon you promised me you'd make my love-light shine With a kiss, your arms around me, make it shine

Wee, wee hours come and let my love-light shine In the wee, wee hours let my lil' love-light shine In the wee, wee hours let my lil' love-light shine Let it shine, let it shine, let it shine
