

Wow! Have you seen what you have done?
That is not fun,
You know what I am talking about.
You broke my robot mind,
I feel blind.

I should call a mechanic,
No one else can help me now.
My circuits burn my eyes!
Fix me now!

My body is metallic,
My heart is mechanic,
You know that we come from the same factory.
Feelings are electric,
My mind feels weak,
You know that we run with the same batteries.

You know I need to understand,
Why I never feel the pain.
You know I used to comprehend,
Now I think I lost my brain.
It ticked like a clock,
Now it is motionless.
Obstructive shock,
Cause I feel I regress.
I think like a bot,
I am so foreseeable.
It seems like a rut,
So let me know!

My body is metallic,
My heart is mechanic,
You know that we come from the same factory.
Feelings are electric,
My mind feels weak,
You know that we run with the same batteries.
