

# Everything Has Changed

Cimorelli

Can somebody please explain to me  
How I can go from feeling fine  
To just one day  
Suddenly

Waking up feeling like  
I don't have much left to give  
Anymore

And I feel like  
I'm falling down now  
Harder than the last time

'Cause when my music's gone  
That's when I really know  
Something's wrong  
Something's wrong  
And right now  
I don't hear a sound

So tell me how you can walk away  
Like nothing has changed  
How can you say  
This is how it's always been  
When the words fall from the page  
Nothing stays the same  
It's not alright  
Everything has changed

If I can just feel the same way all the time  
All this confusion would finally leave my mind

I know this hope that  
I'm feeling inside is  
Not a lie, not a lie

'Cause it's getting harder now  
To see your face  
Getting darker now in so many places

And I'm ready to go now  
Ready to leave this all behind  
And I know that it's the time

So tell me how you can walk away  
Like nothing has changed  
How can you say  
This is how it's always been  
When the words fall from the page  
Nothing stays the same  
It's not alright  
Everything has changed

And there are times  
When I'm not sure  
There are times when I'm lost  
But so are you

So sing with me now  
Sing with me now  
Tell me you're out there  
'Cause I'm not alone in this  
Sing with me now  
Sing with me now  
Tell me you're out there  
'Cause I'm not alone I this  
And I can't be alone in this

So tell me how you can walk away  
Like nothing has changed  
How can you say  
This is how it's always been  
When the words fall from the page  
Nothing stays the same  
It's not alright  
Everything has changed

So tell me how you can walk away  
Like nothing has changed  
How can you say  
This is how it's always been  
When the words fall from the page  
Nothing stays the same  
It's not alright  
It's not okay  
It's not alright  
It's not alright  
Everything has changed
