

Electric Love

Cinderella

When I was down
An angel came to me
And she touched me inside
That woman set me free

Turned on the light
So I could see
That there was fire inside
And I could feel the heat

She's got the power, she gets me high
She can take a storm and make it shine
She keeps the sparks burning over time
That woman's got electric love, ooh, electric love

There ain't no medicine
That makes me fly
Like when I'm with my sweet woman
She keeps me so satisfied

If we had no money, oh no
We'd still get by
And if the world should stop turnin'
Our love would be alive

She's got the power, she gets me high
She can take a storm and make it shine
She keeps the sparks burning over time
That woman's got electric love, look out

She's got the power, she gets me high
She can take a storm and make it shine
She keeps the sparks burning over time
That woman's got electric love

Whoa yeah, she gets me high, so high
Ooh yeah, she makes the stars shine
Burning all the time
That woman's got electric love

Electric love, electric love
She's got the fire, she's got the fire
Electric love, electric love
Electric love
