Waiting at the station Tears filling up my eyes Sometimes the pain you hide Burns like a fire inside

Look out my window Sometimes it's hard to see The things you want in life Come and go so easily

She took the last train out of my heart
She took the last train
And now I think I'll make a brand new start
She took the last train out of my heart

Watching the days go by
Thinking 'bout the plans we made
The days turn into years
Funny how they fade away

Sometimes I think of those days Sometimes I just hide away Waiting on that 9:20 train Waiting on a memory

She took the last train out of my heart
She took the last train
And now I think I'll make a brand new start
She took the last train out of my heart

My lady's on the fly
And she's never coming back
My love is like a steam train
Rolling down the tracks yeah, yeah

She took the last train out of my heart
She took the last train
And now I think I'll make a brand new start
She took the last train out of my heart

She took the last train, out of my heart She took the last train And now I think I'll make a new start Last train out of my heart
