

In my dreams I've seen brutal scenes of war  
Acts of sickness and plague spreading around  
I glorify the ground as I wander  
The aura of life surrounds me as the day turns to night  
My life will never be the same again

Emotions control my every thought  
Emotions make my body change  
They talk to me from inside  
The talk and I combine  
As life surrounds

Strength, don't turn your face from me now  
Can't you see how weak I am without you  
Walk with me, walk my path, enjoy the ride  
As everything goes by I lay my thoughts on you

Like a ticking time machine I'm set to go off  
Be my enemy, be my friend, by my side until the end

Emotions control my every thought  
Emotions make my body change  
They talk to me from inside  
The talk and I combine  
As life surrounds
