

# Always Begin

Circa Survive

never wanted to beg for you  
I never wanted to ask anyone for their help  
I know the one I got  
Don't know exactly what I want  
I'm just making a fatal mistake... from my show

There is always a face you'll make  
Whenever you don't believe (I need you there)  
And I don't know what I want from you  
I can't tell if I lost anything that I need

Always begin before you'd ever prepare  
Never think twice about  
Nothing will come until you're already there  
Never think twice about it all

I never wanted to take from you  
Love everything that you wanted me to have safe  
I know it wasn't true (you know exactly what I want)  
And I'm just making it way too fucked up for myself

There is a face you'll always make (that tell me)  
Whenever you don't believe (I need you there)  
And I don't know what I want from you (...could choose)  
I can't tell if I lost anything that I need

Always begin before you'd ever prepare  
Never think twice about  
Nothing will come until you're already there  
Never think twice about

I know a thousand ways to go (never know)  
That is no way of living though (let you know)  
Always begin before you ever prepare  
Never think twice about it all

I made my bed  
Now I live in my doubt  
I'll change my mind  
And all the ways I breathe

There are a thousand ways to go (never know)  
Let go of everything you know (please tell me )  
Give up on everything you think you need (let me know)  
let me show (please tell me)

Always begin before you'd ever prepare  
Never think twice about  
Nothing will come until you're already there  
Never think twice about it all
