

# Goodbye

Circa Waves

I know I said I want you  
I know I said I want you  
But I changed my mind  
I know I said I need you  
But I get a funny feeling  
That I'm out of line

Where do you get off?  
I hope it's the next stop

And I can see it  
And I can feel it  
The weight of all  
The world is crushing  
Every feeling  
And every lover  
I wish I said goodbye  
I wish I said goodbye

And I know I said I want you  
But you put me in a bad mood  
For Friday night  
So tell me what you want son  
Tell me what you want son  
Is it a fair fight?

Where do you get off?  
I hope it's the next stop

And I can see it  
And I can feel it  
The weight of all  
The world is crushing  
Every feeling  
And every lover  
I wish I said goodbye

Take, all you do is take  
But you need more to break me  
You need more to break me

Take, all you do is take  
But you need more to break me  
You need more to break me

Take, all you do is take  
But you need more to break me  
You need more

And I can see it  
And I can feel it  
The weight of all  
The world is crushing  
Every feeling  
And every lover  
I wish I said goodbye
