

# It's All Over

Circle II Circle

The silence breaks  
The ending fades  
Light escapes the empty days  
So secretive  
So well guarded  
Losing everything  
The way to you chose to live

In the maze you try  
Your will has died  
As time descends  
You've broken all the ties  
What will you be  
What will you see  
Your desperation  
Shows things you bleed

If you live a lie

After all the time  
You try to help yourself  
I can see you're out there  
Preparing the way  
For a special place in hell  
Will you find a way  
To live it down  
No looking back  
Don't question anything  
It's all over now

In the dark unknown  
Secrets never shown  
There's a guiding light  
That leads to the unknown  
In your lies it seemed  
All the world believed  
But time exposed  
You ever- blinding greed

If you live a lie

After all the walls  
You tried to walk right through  
Always looking like you're invincible  
With the fucked up things you do  
Will you find a way  
To live it down  
No looking back  
You never learned a thing  
It's all over now
