

# Solitary Rain

Circle II Circle

I think I'm just a little more lonely  
Then I was yesterday  
My world's just a little more helpless  
Thoughts they drift away  
Acquainted with my own disaster  
Familiar with the pain  
The world's not turning any faster  
SO I think I'll end my stay

I remember how it felt  
When I was standing in the rain  
Looking 'round for any sign of you  
But you were gone  
Knowing in my heart  
I'd never hear you softly say  
I'm here with you  
In the solitary rain

I've spent just a little time running  
From things I've never seen  
Are we sure that the end is coming  
'Cause it doesn't bother me

I remember how it felt  
Just like forever  
There alone  
Like I'd never make it back  
To anything I've known  
Back to where there's something  
Come walk with me  
In the solitary rain

I've come this far  
And still I see  
It's hard to realize  
But I know the flame's still there  
Until the light subsides  
In unfamiliar places here alone  
This cold dark place  
I'm lost within  
The mirror always proves  
The past is shown

Sola Dolor  
Tristitia  
Et vanitate  
Sola  
Dolor  
Tenebrarum  
Solitarium

Fly away  
Take me to a higher place  
As I leave this life  
I will see you there in time
