

## How Long

### Circulatory System

How long? will we ride in the sky  
if we take our advice from the sun?  
how long? just to find once inside  
that the universe is so small

Look back, on the things in your lives  
and take some advice  
from the stars...  
you never knew, you didn't know it was coming  
all we are is fingers on a reaching hand  
will we ride in the sky  
if we take our advice from the sun?
