

## Should A Cloud Replace A Compass

Circulatory System

Rain makes shapes fall on the lights  
And the lampposts, door to door  
Should a cloud replace a compass?  
How long can we think of the world  
As simply up or down (black and white)  
When inside out has come (and gone)  
Telephone wires, they may never reach  
You, they climb up so high, but still  
They never reach you (that's a good thing)
