Keep Askin'

Keep askin' How long will my love it last Always Keep askin' How long will my days they pass Always Keep asking me my love Keep asking help from above

There comes a time And a place when You kind of mind living Day to day when Country to country And state to state where They all got their leaders Who all push their wheight Another mother lost Another child today Bet tommorow that will Be yesterday's Bet you double that Some people enraged On the corner With their voices Raising judgement day

Keep askin' How long will my love it last Always Keep askin' How long will my days they pass Always Keep askin' me my love Keep asking help from above Keep askin' me my love Keep asking help from above
