

Acclimatized slowly to image distortion/selling the wares and wearing so thin/
which is worse? to be in or out of proportion?/documentality always stays in/
squarely screened and sat to face the facts/the content lost the meaning cos
they didn't show the cracks/credits roll and take their toll on the roads that
share the fields/where the factory tractor plows the truth and buried what is
real/overlaid the essence with the smell of leisure time/culture waste as public taste gets dulled and undefined/belief in the disposable is just like being blind/so brighten up the packaging put up a few more signs/eat this fast
food - read this buy now - main course soundtrack - discover just how - we win
you lose - who what where when - only joking sit back - then forget and start
again/I've been told I've got a mind of my own/and they say you can't believe
anything you're told/and I read how easy it is to make decisions/and I saw
someone like you on the television
