

Unemplode

Citizen Fish

This man works - Oh no, he doesn't
In the local - No, it isn't
Family run - Out of business
Shop destroyed by supermarkets

This man works for next to nothing
Just to keep the dole incoming
Hundreds like him on the phone
He's ringing around the poor and lonely

I don't wanna have to
Do the things you won't do
(2x)

Other people rarely met have meetings in our interest
And tapping into latent patriotic senses they suggest
That it's the country that's in debt
But as we scour the internet
For cheaper ways to make ends meet
We know the picture's incomplete

[Chorus]

Money makes the world collapse
Your workforce just fell down the cracks
Join the queue of the underpaid
Just to hear, "no jobs today"
It's easy now to say you care
But country's run by millionaires
It's rich boy bullshit overload
In a nation set to unemplode
