

The Dark Side

City Lights

The voices in your head

You must fight to endure
Hope is the only cure

Everyone you hold close
Is poison to your mind
Be mindful of your feelings
They may pull you from the light
I sense great fear in you
And that could only mean one thing
Fear leads to anger and anger to hate
And this is why darkness surrounds your fate

The voices in your head
Don't listen to what they say
Just keep doing what you do
When you're doubting yourself
And it's clouding your mind
Stay away from the dark side
You must fight to endure
Fear is a disease and hope is the only cure
Fear is a disease and hope is the only cure
Fear is a disease and hope is the only cure

When surrounded by war you must always choose a side
Don't give in to greed and envy, you'll be betrayed by your pride
Without humility courage is a dangerous game
The winding path to peace is always a worthy one
Regardless of how many turns it takes

The voices in your head
Don't listen to what they say
Just keep doing what you do
When you're doubting yourself
And it's clouding your mind
Stay away from the dark side
You must fight to endure
Fear is a disease and hope is the only cure

You were supposed to be the chosen one
The chosen one
The universe can make you feel invisible
So don't forget about your principles
Keep your friends close and your demons at bay
Your demons at bay

The voices in your head
Don't listen to what they say
Just keep doing what you do
When you're doubting yourself
And it's clouding your mind
Stay away from the dark side
You must fight to endure
Fear is a disease and hope is the only cure
Fear is a disease and hope is the only cure
Fear is a disease and hope is the only cure
