

It's Over

Civil Twilight

You and I driving down Broadway looking for some action
Two scattered souls in a scattered world
Your hands on the wheel and your eyes searching for cover
But one look from you and it's over
One look from you and I'm over

I can't sleep with this heart's beat
Thumping in my chest like an engine
So I gather all my things in the corner of the room
And I light the match and watch it burn to my fingers
But one word from you and it's over
One word from you and I'm over

People try to get what they want
People try to hold it so close
But they don't know that my heart is driftwood floating down yo
ur coast

It's been two weeks now since I walked through that front door
It's been two weeks since I've felt your skin
And tonight you wear this spirit like a cover
And one touch from you and it's over
One touch from you and I'm over

Just one touch from you and it's over
Just one touch and I'm over
