

# Disengage The Simulator

CKY

With the error that's in my mind  
And in my soul

I'm driving blind

I got a picture in the box  
That is bringing me to where I am

Yet the eyes are all affixed on you not me

For driving blind

And the first time will be the last time  
That you believe

You're falling as you decide  
Face down the whole world wide  
Before cannot be retrieved

From all the way up here there's no end  
I'm flying high  
But the worst is never first  
And there's a person that'll set you straight

Cancelling the force within my brain  
For flying high  
The simulator has been disengaged

Indifference begins to take sides  
Face down the whole world wide  
Before cannot be retrieved

From all the way up here there's no end  
I'm flying high  
But the worst is never first  
And there's a person that'll set you straight
