

## Ketamine and Ecstasy

Clap Your Hands Say Yeah

Ketamine and ecstasy  
Your words are hanging in the trees  
A whole university just rises

Don't ask to sooth me  
I'm deaf and muted  
It seems that I would have to do  
Me trying to hold on to you  
And you trying not to put up a fight

Have I become a stranger to this country?  
Was I ever even in any country at all?

I want you what you want out of this  
You can be sure  
Here comes the rain again  
To wash away what we had

We'll find yourself a substitute  
To loose the dogs upon the shoot  
You say the car can steer itself tonight

Running around as the nightmare clouds  
Are bare enough till I will cry  
As anyone can see we're meant to be  
Well we don't really belong

Have I become a stranger to this country?  
Was there ever even any country at all?

I want what you want out of this  
You can be sure  
I want what you want out of this  
You can be sure

I want what you want out of this  
You can be sure

Here comes the rain again  
To wash away what we have run
