

We can look for with me all night long
We're getting nearer, waiting on borderline
If she would talk through the wall, painful night call
Just hanging around, a real love won't let you down

And there's one way up, there's one way down
And she would love just to have myself around
And there's one way up, there's one way down
And she would love just to have myself around

Get yourself in love, stand on no one
Could link my time, waiting on the borderline
Just standing alone, away by default
And if I have to return, I'll kneel down and let you burn

And there's one way up, there's one way down
And she would love just to have myself around
And there's one way up, there's one way down
And she would love just to have myself around
