

Impulse

Claude Kelly

We're just in here I can act, breaking out, please I need the music loud, really loud
Dj's controlling the crowd, in the crowd, way too many I can count
We come to life when the sun goes down
And wait for the lights to go out
Like there's no electric, there's so electric lost in the bits of really all that you left when, it's too

Baby come on and follow your impulse, impulse
We should let go and follow your impulse, impulse
Baby come on and follow your impulse, impulse
Don't think about it, just look around, yeah
Just follow your impulse, impulse
Go off with your impulse, impulse
Just work with your impulse, impulse
Don't think about it, just look around, yeah

We came here to transform, transform
Come and watch a star is born, born, a star is born
Light years always from the north, from the north
We'll keep rock rocking till the dawn
We come to life when the sun goes down
And wait for the lights to go out
Like there's no electric, there's so electric lost in the bits of really all that you left when, it's too

Baby come on and follow your impulse, impulse
We should let go and follow your impulse, impulse
Baby come on and follow your impulse, impulse
Don't think about it, just look around, yeah
Just follow your impulse, impulse
Go off with your impulse, impulse
Just work with your impulse, impulse
Don't think about it, just look around, yeah

Your first reaction, just let it happen, don't hold it back from me
Don't think about it, just look around you, everybody's doing the same

Baby come on and follow your impulse, impulse
We should let go and follow your impulse, impulse
Baby come on and follow your impulse, impulse
Don't think about it, just look around, yeah
Just follow your impulse, impulse
Go off with your impulse, impulse
Just work with your impulse, impulse

Don't think about it, just look around, yeah.
