

Fill This Night

Clazziquai Project

The setting moon divides the sky, and pauses above
Rescuing me from my despair with its light
There is another world within
Pulling and calling us, come with me now

Let's get dance
Moving in a right time
Let's get dance
Moving in a right time

At this time, everyone afraid of the night sleeps
Where is the moon taking us?
In this life where the end cannot be seen
Mysteries are hidden in the moon
The strength we have is brought up miraculously

You fill this night with me
You fill this night with me
You fill this night with me
You fill this night with me

This blinding night
I want to go back, but it can't be done
Where is the night taking me?
There is another world within
Something different is
Pulling and calling us, come with me now

Let's get dance
Moving in a right time
Let's get dance
Moving in a right time

You fill this night with me
You fill this night with me
You fill this night with me
You fill this night with me

Dance, dance, dance, dance

You fill this night with me
You fill this night with me
You fill this night with me
