

Crush

Clea

It was cold outside when you walked in
How was I to know the way that I would feel
You kissed me like a promise and
From that moment on I realised that we'll

We'll be flying
We'll be floating
Just as long as you're with me

It's just a little crush
But now it's turning into love
I'm tripping on a world of everything
With what your love brings
It's just a little crush
You know I can't give you up, who
Who would have thought that our first kiss
Could possibly lead to this

As natural as breathing
You become a part of me
I don't want this dream to end
To touch you and to feel you near
As far as this love goes
To the sky and back again

We'll be flying
We'll be floating
Just as long as you're with me

It's just a little crush
But now it's turning into love
I'm tripping on a world of everything
With what your love brings
It's just a little crush
You know I can't give you up, who
Who would have thought that our first kiss
Could possibly lead to this

Now everything is clear (clearer)
I couldn't wish for anyone to love me better
And I love to watch you move
And I love the idea of loving you
It's so easy to do

It's just a little crush
But now it's turning into love
I'm tripping on a world of everything
With what your love brings
It's just a little crush
You know I can't give you up, who
Who would have thought that our first kiss
Could possibly lead to this

It's just a little crush
But now it's turning into love
I'm tripping on a world of everything
With what your love brings

It's just a little crush
You know I can't give you up, who
Who would have thought that our first kiss
Could possibly lead to this
