

## New Car

Cledus T. Judd

Come on you no good worthless piece of foreign  
Wait while I get me a royalty check  
I'mma buy me an American made car  
Piece of junk

People always shout obscenities  
When I stall in their lane  
They're all convinced when they see me  
Driving this heap that I'm insane

But seat belted in  
I push the gas down fearlessly  
Breaks stop working then  
I watch the engine overheat

I need a new car, I can't ever get far  
This one breaks down on me all the time  
It's got four bald tires and it always backfires  
And I'm sick of that check engine light  
I need a new car

I replaced all the cables and hoses  
Had grease all over my face  
For a couple weekends  
I had parts thrown all over the place

I put it back together fast  
But now it's even worse  
Now my friends just laugh  
'Cause it only goes in reverse

I need a new car, getting to work's hard  
When you have to drive backwards all the time  
I'd find a junkyard and I'd sell it for parts  
But I know they won't give me a dime  
I need a new car

I won't repair anymore  
Now the dang transmission's about to fall out  
The only thought that's on my brain is the new car  
I could be driving now

Rumor is they're having a sale  
At the push-pull or drag car lot  
If I can get this towed down there  
I swear I'll take anything they've got

So with a credit line  
Of 20,000 plus  
No interest or money down  
And no more taking the bus

I got a new car looking like a big star  
I don't care if the price was too high  
It's got a VCR, cruise control and on star  
So I know where I'm at all the time  
I got a new car, he got a new car
