

I've Got News for You

Cliff Richard

I've got news for you this is not a game
I've got news for you are you listening
I've got news for you we are all the same
We can start to live again

Everybody's going to the movies
Everybody's leavin' for the show
Seems as if we've lost the nerves for feeling
And no one's in the mood to want to know

I've got news for you this is not a game
I've got news for you are you listening
I've got news for you we are all the same
We can start to live again

Can you look inside yourself and tell me
That your emptiness is just a state of mind
And that you'll feel better if you just keep busy
If you leave your feelings all behind

I've got news for you this is not a game
I've got news for you are you listening
I've got news for you we are all the same
We can start to live again

Ever feel as if your heart was whispering
Like a special voice you never heard before
And something deep inside your soul was tickin'
As if someone was pounding on the door

I've got news for you this is not a game
I've got news for you are you listening
I've got news for you we are all the same
We can start to live again

We are all the same
This is not a game
We are all to blame 'cos we are all the same
This is not a game
And we are all to blame
Aah - we are all the same - I've got news for you
This is not a game - we are all the same - we are all to blame
This is not a game - we are all the same - this is not a game
