

In the Stars

Cliff Richard

It was in the stars
That we should love
It was always meant to be
For somewhere out beyond infinity
Some strange divinity sent you to me

So let's be thankful for this happiness
Send to us from up above
Darling who are we to find our destiny
Our pass like closer than a hand is to its glove
It was in the stars that we should love

Let's be thankful for this happiness
Send to us from up above
Darling who are we to find our destiny
Our pass like closer than a hand is to its glove
It was in the stars that we should love
