

True Love Will Come To You

Cliff Richard

Pretend you're smiling when you're blue
Dear and true love will come to you
Pretend you're happy when you're sad
Dear and true love will find its way to you

Young emotions can't break her heart in two
That's why you got to wait until love comes to you
Pretend you found the one you prayed for
Just like you used to do

And when the right one comes along
Dear, you know true love has comes to you

Young emotions can't break her heart in two
That's why you got to wait until love comes to you
Pretend you found the one you prayed for
Just like you used to do

And when the right one comes along
Dear, you know true love, you know true love
You know true love has come to you
