

# You're Just the One to Do It

Cliff Richard

I need someone with tender arms  
To hold me closer all the time  
To keep our love safe from harm  
You're just the one to do it

I need someone with tender lips  
And burn like fire when we kiss  
Someone to make my heart beat flips  
You're just the one to do it

I'm takin' my heart's advice  
I'm gonna try make you love me  
I'm pledging my heart, my love and my life  
If you place no one above me

My time will come, so people say  
I'll need someone and on that day  
She'll chase all my blues away  
You're just the one to do it

I'm takin' my heart's advice  
And I'm gonna try make you love me  
I'm pledging my heart, my love and my life  
If you place no one above me

My time will come, so people say  
I'll need someone and on that day  
She'll chase all my blues away  
You're just the one to do it  
You're just the one to do it  
You're just the one to do it
