

# Everything I Need

Clint Black

Everything I need all depends on you  
Everything I want is everything you do  
It's been handed down through time  
It's really nothing new  
Boy meets girl, I meet you  
A love song that could never be untrue

[Chorus:]

All I need is everything I want  
It's a fundamental greed  
All I need is everything you flaunt  
That's a language I can read  
All I need is everything I want  
And that makes you everything I need

Everything I need is on my one-track mind  
Everything I want is where I draw the line  
I'll take all you've got to give  
Spend up all your precious time  
You can't undo the ties that bind  
Or hide the moon that needs the sun to shine

[Chorus]

Everything I need can't get it on TV  
Everything I need is absolutely free  
Everything I need is pure biology  
That will bring me to my bended knee  
My craving you will sweetly torture me

[Chorus]
