Live and Learn

Clint Black

I've tried livin' it risky, relied on women and whiskey To chase my blues, turn my nights to days First rage only a pastime, with age more than a lifetime Day in, day out the world just turns away But everybody knows you live and you learn But the lessons just go on and on I guess we're gonna have to wait for all the pages to turn To find out if it's right or if it's wrong, you live and learn I've stopped lookin' for questions, I've got only suggestions Black and white can only turn to grey In time we're all gonna find out our times all gonna wind out And just count down until that judgement day But everybody knows you live and you learn But the lessons just go on and on and on I guess we're gonna have to wait for all the pages to turn To find out if it's right or if it's wrong, you live and learn, you live and learn
