Follow the leader exhaust pipes and breathers,
The flash from the barrel turns bullies to believers,
The time of the life make the bitches wanna keep ya,
This is my reality want it well let me teach ya

Follow my footsteps who tragically en-triumph Through flows I give you mind comft Kilos consign dem, do as I say like Simon And you too will diamond blind hun

I'm on my Dylan Dillinger, flow just killin' ya
Ya wonder why the real ain't feelin ya, ya fraudin'
I masoned y'all martin margedem?
O's together since H-O-V was named rotten Charles Jordan
Yeah I kept em noddin', snorting, slobbin', barfin', then bought cars off em
The realest rapper that unwrapped and docked em,
If you can fit these shoes then walk em, I parked em

It could've been a corner, but I had to save my soul (save my soul)
I'm out there chasing my dreams lookin' for a place to go (place to go)
Tryin' to get up out the ghetto come follow with my footsteps
Damn it maybe middle? then follow with my footsteps
Cause if ya don't it might be danger

It's not for you to do as I do rather do as I say These footsteps could lead you astray, Lead you to the cell or lead you to a grave Either way you may never see the light of day Don't let my wrongs do you the right away To immolate my past escapin' the lords grasp Told you the truth yet who was I to brag Especially seeing how? Armani fines ain't hard to last I miss my homie but she's missing her dad It weighs on my conscious and I hate conscious rap Apart from that I wish to see you succeed So I speak to my people on the spirit of Chuck D You behind the glass trust me and cut deep Then the words to every verse on it me in my sleep So now what you see is malice and contradiction People have hears hope you listenin' come on

Thought you how to rock right shit up on your toes
I thought you how to smile for the camera when heart broke
