

## Hear Me Out

Close To Home

Hello my enemy were meeting one more time  
your carrying my ego and your stealing every line  
I've had all I can drink, I've given up for this disease  
Please pull me out now, I'm already to far gone

This fires burning and I'm right here are the edge  
It's everything I wanted, But I'll fall to these regrets  
I'll beg for something just to feed this pure release  
But this fires my desire and it's slowly overtaken me

Now everyone has seen reactions to my crimes  
I'm calling out for help please someone tell me I'm alright  
I'm so sick and depressed of this loneliness  
I'm just a failure  
Its addiction to your eyes

Take back, take it all away  
Take back, take it all away  
I've never let you down  
So just hear me out  
Falling away from me, just to escape reality  
So please pull me out, before I drown myself

I think I'm lost here again, a mistake and I've let myself down  
I know I'm over the edge, a mistake and I've let myself down, let myself
